EDUCATION

Double Diploma Program between Baku Engineering
University and INHA University(South Korea) 2022 - 2026
Information Technologies Engineering, Bachelor

WORK EXPERIENCE

Arter (Software Company,Software Engineer,September 2024 - Current)
• Working on the web application of one of the most popular ticket buying startup called "Ebiletstore".
• Tech Stack: Next.js(pages router), Tailwind, GraphQL(Apollo), PostgreSQL(Prisma), NextAuth, DigitalOcean(App Hosting,
Database Hosting),Ubuntu server(Nginx,PM2)
• Integrated 2 popular payment providers(Epoint and Payriff)
• Improving and refactoring current codebase
• Automating deployment and development(CI / CD)

Crocusoft (Software Company,Onsite React Native Intern,March 2024 - June 2024)
• Using React Native,TypeScript,3rd party packages,Zustand for building IFarmer app
• Using Supabase as a relation database and storage
• Implementing efficient React techniques for improving performance and decreasing re-rendering

Achieve.nl (Netherlands,Remote,Freelance Nextjs Developer,January 2024 - May 2024)
• Migrated old next version 12 pages router codes to latest app router next version(14)
• Used TypeScript,Tailwind; Implemented various rendering techniques mainly such as SSG/ISR
• Used MongoDB and React-Admin by Marmelab for building admin panel
• Used bunch of 3rd party packages
• Deployed app to vercel.com

PERSONAL PROJECTS

Techantgram(social media for developers)

• Frontend:React(Vite),TailwindCss,Redux(Toolkit),React Modal,React Toastify,Formik,Yup,React Icons,React LoaderSpinner,Framer Motion
• Backend:Node.js,Express.js,MongoDb,Bcrypt.js,Body Parser,CORS,Cookie Parser,Dotenv,JWT,Multer,Sendgrid,Mongoose
• Deployment:Namecheap(domain),Linode(cloud provider),Vercel(frontend deployment),Nginx,Certbot(free ssl/https)
• Users can login/register,when they register OPT is send to their mail,users can post pictures,can comment,can like and can follow any user
• Learned managing tokens,cookies,performance tips,writing APIs,working with DB in a high level

TECHNICAL SKILLS

I have coded on/used though my career:
1)Frontend - React, Next, Tailwind, Three.js
2)Backend - Node, Express, Nest, Java(Spring Boot)
3)Mobile - React Native, Flutter, Kotlin(also with Jetpack Compose)
4)Desktop - C#(windows form)
5)Database - MongoDB, PostgreSQL

Languages, specifically Libraries and Frameworks are the way more abstracted ways to build software. If I need to build
an app on another library surely I can learn it on some days and build that software!

ACTIVITIES AND NOTEWORTHY DETAILS

Creating YouTube videos about programming and solves leetcode problems.

AHIEVEMENTS

608.7/700 points University Admission point/One of the selected 128 students for DDP
Top 10 - Azerbaijan Collegiate Programming Contest 20th SemiFinal
5th Place - EduArt - DigiEduHack Baku'23 Hackaton

LANGUAGES

Azerbaijani - Native
English - B2
Korean - A2
